

How to open a combination lock

Fill in the blanks below, cut out this cheat sheet, and keep it somewhere handy – like the inside cover of your planner.

The combination for your lock

___ ___ ___

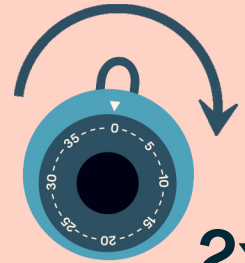

Combination lock

1st number in your combination

1. Turn the dial **2 full turns to the right**, so you pass “0” twice.

Stop when ___ lines up with the triangle at the top of the lock.

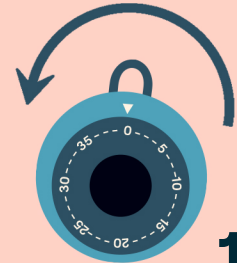

2x

2nd number in your combination

2. Turn the dial **1 full turn to the left** past the first number in your combination.

Stop when ___ lines up with the triangle.

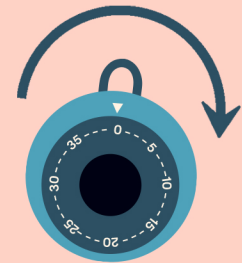

1x

3rd number in your combination

3. Turn the dial **to the right**.

Stop when ___ lines up with the triangle.
Pull down to open the lock.

If the lock doesn't open after step 3, go back to step 1 and try again. Still stuck? Ask a teacher or a custodian for help.

Cut out on the dotted line
